

Terahertz Imaging Kit

SOLUTION OVERVIEW

The INO THz kit makes THz imaging easy, whatever your needs. The kit features our MICROXCAM-384i-THz camera, which delivers high sensitivity across a wide spectral range, as well as a lens and a 0.28 GHz or 0.5 GHz light source with two modes of operation: transmission and reflection.

The user-friendly kit also comes with operating software that allows you to adjust camera settings, calibrate the camera, perform certain image corrections, and more.

TYPICAL APPLICATIONS

- Security screening and surveillance
- Manufacturing
- Laboratory experiments
- Concealed weapons detection
- Vision through camouflage
- Quality control, process monitoring
- Dental and medical imaging
- Food inspection
- Non Destructive Testing

BENEFITS

- Can be used in both transmission and reflection modes
- Includes everything for THz imaging (camera, optics, and a source)
